Satel[®]

ANT-GSM-E

GSM ANTENNA

The **ANT–GSM–E** dual–band antenna is designed to work with alarm control panels and communication modules which have GSM telephone and standard SMA connector. The **IPX–SMA** adapter allows you to use the antenna also for other devices operating in the 900/1800 MHz frequency bands.

ANT–GSM–E antenna design enables it to be mounted on enclosures offered by SATEL.

- 900/1800 MHz antenna
- SMA male connector
