

DB-400

ADDRESSABLE DETECTOR BASE

The **DB-400** mounting base is used to connect the following detectors:

- **DMP-400** – addressable multisensor smoke and heat detector,
- **DRP-400** – addressable optical smoke detector,
- **DCP-400** – addressable fixed temperature / rate of rise heat detector

to the detection line of the **ACSP-402** addressable fire alarm control panel.

- ability to disconnect a detector without breaking the detection line
- easy to disconnect a detector from the detection line for the purpose of periodic checks or maintenance
- ability to connect flush-mounted and surface-mounted detection line wires
- ability to connect the **WZ-110** remote indicator by SATEL
- suitable for installation on the **PDB-100** industrial base by SATEL for protection against water when water vapor condensation may occur on the ceiling
